

# FELT WOOL DIFFUSERS

## What is Felt Wool:

Felt wool is a highly absorbent, natural fiber which makes it a great match for essential oils! These diffusers; car and wild flowers, are a way to disperse the aroma of essential oils throughout your vehicle or office! Inhaling essential oils is a great way to boost your mood, strengthen your immune system, promote focus and help you to relax.

## To Use:

Place a few drops of essential oil onto the felt balls. Try not to saturate the felt, a few drops will do! The felt acts as a diffuser by absorbing the oil. Depending on the amount of oil used, your scent can last a few weeks up to a month!

Car air diffusers can last for several weeks up to several months depending on the amount of fragrance used and the weather

## For Car Diffuser:

Clip the clothes pin to your air vent.

## For Wildflowers:

Place on your desk, night stand or bookshelf. Placing it near an air vent will help circulate the aroma.

## \* Helpful hints:

Scents may fade faster in the summer, and they tend to evaporate quickly in hot weather.
